

Check your pallets for high racking suitability - with the pallet check system from CCI

- The pallet check system checks empty pallets to defined criteria. After the checks the pallets can be sorted in different categories.
- Suitable for all standard pallet models such as euro, industrial and half pallets. Other pallet types are possible on request.
- All checks are carried out without the use of hydraulics.
- With an optimum arrangement of the conveyor lines, a throughput of 350 pall./h (Euro) or 450 pall./h (Düdo) can be realized.
- Standardized check modules guarantee optimal functionality.
- The modular design enables a customized composition of the required checks.
- Easiest operation due to the user-friendly menu navigation on the operating terminal.
- The standard PLC contains various statistical evaluations.
- The massive frame construction made of rolled steel profiles underlines the high quality and robust processing of the machine.
- Surface powder-coated in your RAL color.

Check modules

- Cleaning brush
- Nail roller
- Pressure test of deck and running boards
- Tensile test of block nailing
- Block control / completeness of the blocks
- Free space control
- board width test
- Optical inspection of the pallet color
- Checking the board humidity
- Optical control of the block row (via light barriers)
- Optical inspection of the pallet dimensions (via light barriers)

List of abbreviations

FGT	= Type of conveyed material	FB	= Conveyor width	GH	= Overall height	x	= Grid tray = 250
FGB	= Width of conveyed material	RB	= Frame width outside	FGG	= Conveyed material weight		
FGL	= Length of conveyed material	FL	= Conveyor length	v	= Speed		
FGH	= Height of conveyed material	FHmin	= min. conveyor height	P	= Power		

Standard dimensions in mm (Special versions are possible on request)

Conveyed material				Conveyor data					Weight conveyed material in kg	Drive roller conveyor	
FGT	FGB	FGL	FGH	FB	RB	FL	FHmin	GH	FGG	P in kW	v in m/s
Düdu	800	600	165	1060	1450	3800	550	FHmin + 1450	max. 100	0,37	0,3
Euro	800	1200	144	1060	1450	3800	550	FHmin + 1450	max. 100	0,37	0,3
Indu	1000	1200	144	1260	1650	3800	550	FHmin + 1450	max. 100	0,37	0,3
